

# Age 12 - 16 - Match the Materials

Draw a line to match the correct description to the different building materials.

**MORTAR**

This is a transparent material used for letting in light and keeping bad weather out.

**FOAM**

This is a thick paste made of sand, water and sometimes cement.

**BRICK**

This material helps to keep a house warm by being layered between other materials.

**GLASS**

This material comes in different colours, can be bendy and melts at high temperatures.

**PLASTIC**

This is made by being fired in a kiln. It is heavy, strong and used to make the walls of the house.
